

## Section 278 works & construct a new three lane access road

SB Civil Engineering entered into a sub-contract with Lagan Construction group to deliver the Section 278 works package and construct a new three lane access road. The works provided the link from the public highway through a section of waste land into a new state of the art Energy Recovery Facility at the existing landfill and recycling plant in Beddington, Sutton.

**Beddington, Sutton**

---

**Client.** Lagan Construction

---

**Duration.** 12 Weeks

---

**Valuation.** £650k - £850k

---

Our usual diligent approach ensured all works were completed safely to extremely high standards within the 12 week works programme

## Project Overview

---

As with all S.278 works ensuring the road network was unaffected as much as reasonably practicable and making provisions for public safety is at the forefront of SB Civil Engineering's planning and working methods.

Our usual diligent approach ensured all works were completed safely to extremely high standards within the 12 week works programme with minimal disruption to the landfill site operator and main works site.

### Project Scope of works

---

Site clearance  
Highway junction remodelling  
Traffic signal infrastructure  
(including NAL sockets, access chambers and ducting).
